

Use Case

Pass PCI Compliance Audits, Lower Costs, and Optimize Your Security Posture

Identity-Defined Networking: Instant Overlay Networking

The Challenges of PCI DSS 3.2 Compliance

The increased sophistication of attacks that bypass traditional defenses has accelerated breaches over the years forcing organizations to spend more time on security than ever before. However, the unfortunate reality is that even if an organization is deemed PCI compliant, its network and assets are not necessarily protected against cyberattacks.

Simple PCI Compliance

Tempered Networks' solution is highly effective in supporting the key requirements and controls of PCI DSS and ensuring your PCI assets are secure. We give you control of the audit scope for PCI systems and assets and provide a level of isolation and containment previously unattainable. Removing systems and devices that do not belong 'in scope' can be done in a few mouse clicks.

Achieve PCI Compliance and Heighten Your Security Posture

- Instant creation of secure micro-perimeters for PCI systems
- Easy addition of PCI assets to specific groups
- PCI reporting that ensures proper controls and policies are in place
- A reduction in time spent on audit preparation that cuts IT OpEx costs

Decrease IT CapEx and OpEx costs as much as:

50%

Reduce networking & resource provisioning time up to:

97%

Reduce attack surface by up to:

90%
